

1. **Gas Shut Off:** cuts off the gas supply to the flat. White painted metal handle situated inside the wall cupboard in the corner of the kitchen.
2. **Stop Cock:** red handle cuts off the water supply to the flat should there be a leak. Is tucked in the corner of the kitchen behind the boiler.
3. **Gas Meter:** Situated on the back wall of the kitchen inside the wall cupboard. You shouldn't need access to this as it's wirelessly linked to a smart meter.
4. **Electricity Meter:** Situated on the back wall of the kitchen inside the wall cupboard directly left of the cooker hood. You shouldn't need access to this as it's wirelessly linked to a smart meter.
5. **Cooker Hood Isolation Switch:** hidden behind the chimney for the cooker hood, cuts off power to the cooker hood.
6. **RCDs / Circuit Breakers:** the circuit breakers for all electricity to the flat. Located in the left-hand kitchen wall cupboard. All circuits are correctly labelled.
7. **Cooker Power Switch:** Large wall mounted red switch with indicator light controls power to both the built in cooker and ceramic hob. Located inside the kitchen wall unit just left of the RCDs.
8. **Built in Oven Isolation Switch.** Located inside the lower cupboard to the left of the built-in oven. Cuts off power to the built-in oven.
9. **Ceramic Hob Isolation Switch.** Located inside the lower cupboard to the left of the built-in oven. Cuts off power to the ceramic hob.
